# What can the workplace learn from home?

At Inno, this question has guided the development of our **Cosy Office** concept, since year 2012.

The idea is simple: to bring some of the emotional qualities of home into the spaces where people connect, collaborate and spend time together. Not the sofa or the slippers, but the feelings behind them: comfort, ease, belonging, authenticity and warmth.

We believe that when people feel comfortable in their surroundings, spaces become more natural places to meet, exchange ideas and spend time together. The workplace becomes not only a place for getting things done, but a place where people can feel at ease and be themselves.
Our latest products build on this idea. New additions to the **Lab XL** easy chair and the versatile **Naku** product family, the wooden **Takit** and **Cross** coat racks, and the **Lab Dot** and **Lab Dot+** seating collection offer new tools for creating welcoming, adaptable environments.

Together, they help shape spaces that support everyday encounters, encourage connection and make the workplace simply a good place to be. Through thoughtful choices of materials, colors and furnishings, these spaces can be tailored to reflect different identities and atmospheres, transforming comfort into personal expression and creating distinctive brand and workplace experiences.

Lab XL Low | Lab XL High

Lab XL Metal

# Lab XL - Metal

Design: Harri Korhonen

700x750x H740mm

Lab XL Metal is a fresh evolution of our uniquely comfortable  Lab XL Low easy chair, retaining its generously padded seat and distinctive proportions while introducing a refined, clean-lined metal frame.

The new frame gives the chair a lighter, more contemporary character and adds durability for high-use environments. It's the perfect choice for modern lobbies, lounges, offices, and hotels seeking both comfort and a more architectural expression.

The Lab family includes a wide range of chairs, tables, and sofas designed to bring comfort and coziness into everyday working environments. Select the right materials, fabrics, and colors to shape the style and mood you want to create, bringing unique brand identity and memorable interior experiences to life.

# **Lab XL - Metal** with armrests

Design: Harri Korhonen

830x750x H740mm

Lab XL Metal with armrests introduces an additional functional detail to the design of the Lab XL Low easy chair.

The gently curved metal armrests follow the chair's distinctive silhouette, becoming a natural extension of its clean-lined frame. Beyond their visual character, they provide practical support when sitting down or standing up from the generously padded, low seat.

The result is a comfortable, relaxed lounge chair that combines a light architectural expression with thoughtful everyday functionality.

# **Lab XL - Metal** Sofa - 3 seater

Design: Harri Korhonen

1900x750x H740mm

Lab XL Metal Sofa is a generous three-seater addition to the Lab family, bringing the distinctive comfort and soft, inviting character of Lab XL to a larger format. Its generously padded seat and backrest are supported by a refined metal frame, creating a light, contemporary expression while providing durability for high-use environments.

Designed for lobbies, lounges, offices, and hotels, the sofa combines relaxed comfort with a clean, architectural character.

The Lab family includes a wide range of chairs, tables, and sofas designed to bring comfort and coziness into everyday working environments.

# Sofa System

Design: Harri Korhonen

Lab Dot+ Sofa System is a flexible modular seating system designed to bring softness, comfort, and a strong architectural character to modern work and public environments. Its generously upholstered, pillow-like forms create an inviting expression while maintaining a clear and distinctive identity.

Individual seating modules can be combined to create everything from compact two- and three-seater sofas to larger configurations for open spaces. Angled modules introduce additional flexibility, allowing for varied layouts and more expressive compositions that adapt naturally to different interiors and architectural contexts. The gently curved backrests create a soft, flowing rhythm when arranged in groups, bringing warmth and visual harmony to larger seating compositions.

Part of Inno's Lab family, Lab Dot+ reflects the idea of the cosy office, bringing comfort, flexibility, and opportunities for social interaction into spaces where people gather, work, and feel at ease.

# Lab Dot Chair

Design: Harri Korhonen

800x720x H800mm

**standard legs**

**Swivel base with return mechanism**

Lab Dot Chair is a new addition to Inno's Lab family, introducing a fresh, architectural take on soft seating for public and work environments.

Rooted in the cosy office concept of the Lab series, it combines strong character with a welcoming sense of comfort.

The Lab Dot Chair is built from three generously pillow-like elements gathered around the seat. This simple construction creates a bold, sculptural form that feels soft, relaxed, and inviting. Fully upholstered, the chair balances architectural clarity with everyday comfort. An optional swivel base is available, with or without return-to-centre mechanism. Designed for modern offices, lounges, and public spaces, Lab Dot continues Inno's exploration of comfort, flexibility, and social interaction, key elements in creating spaces where people want to gather, work, and feel at ease.

# Naku Stack Metal

Design: Harri Korhonen
520x580xH780mm

The metal-frame version of the Naku Stack Chair offers a contemporary take on a versatile seating design. Its powder-coated steel frame provides strength and stability while preserving a balance and gentle silhouette. The chair is available with or without armrests and is designed to stack neatly when not in use. The seat is available unupholstered or fully upholstered in fabric. Designed for demanding public and semi-public spaces, the Naku Stack Metal Chair fits naturally into restaurants, meeting and dining rooms, and relaxed gathering areas, where durability and balanced design are essential.

## Space Divider

Design: Harri Korhonen
L: 2100x420xH2000mm
M: 2100x420xH1270mm

Naku Shelf L

Crafted from high-quality certified wood, the Naku Shelf features a self-supporting structure that enables easy assembly and disassembly without the need for tools.

The name Naku, derived from the Finnish word for “naked,” reflects the product’s honest and pared-back design approach. Stripped of excess, the shelf emphasizes clarity of form, allowing materials and structure to take center stage.

Designed with simplicity and versatility in mind, Naku functions both as a shelving system and as a space or room divider. Its composition, combining open shelving with back panels, creates a sculptural presence, offering rhythm and visual depth within a space.

Its flat-pack design, maintained throughout various stages of its life cycle, optimizes transport efficiency, reducing its carbon footprint and supporting Inno’s commitment to sustainability. The product’s carbon footprint for the largest size, calculated through a life cycle assessment (LCA), is 22 kg $CO_2$ eq.

Naku tables are crafted from solid wood, featuring a simple, unembellished design that highlights the elegance of natural materials and expert craftsmanship. Their clean lines and straightforward style create an authentic aesthetic, making them a versatile choice for a wide range of environments. This combination of functionality and quality craftsmanship makes them suitable for both private and public spaces. The carbon footprint of the Naku Table (Dia. 1200 x H 720 mm), calculated through a life cycle assessment (LCA), is 17 kg $CO_2$-eq.

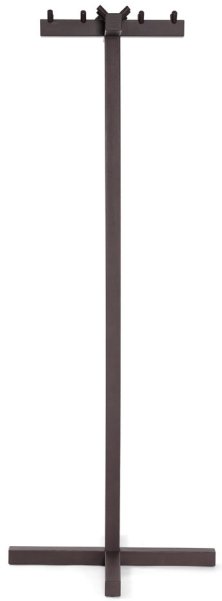
# Cross

Design: Harri Korhonen
650x650xH1650mm



Cross is a self-standing coat rack that embodies the simplicity of Nordic design with its straightforward, minimalist composition. Crafted from certified solid wood and easily shipped flat-packed, this versatile piece is designed for modern, flexible living spaces, combining practicality with sustainable values. Its bold cross-like structure features 18 hanging pegs, offering generous space for coats and accessories while maintaining a clean, understated appearance.

Cross Coat Rack

# Takit Wood

Design: Jouni Leino
Coat rack: 1000x440xH1800mm
Bench: 920x400xH455mm
Shoe rack - double: 920x400xH250mm
Shoe rack - single: 920x400xH40mm

Building on the design of our Takit metal coat rack by Leino, this new modular version combines simplicity with practicality. Made from certified solid wood, it offers a warmer, more natural feel.

Designed to function as both a coat rack and a space divider, it's part of a product family that includes a matching bench and a double or single shoe rack that can be used either inside or outside of the coat rack. Use it in rows or as individual units. Its clean lines and minimalist style make it a versatile choice for modern public spaces.
