

Tilt L YA

Juha Rista

inno

Tilt L YA is a meeting and visitor chair with 4-star cross leg and 360° swivel. Designed by Juha Rista, the elegant lines of the chair were inspired by the streamlined car designs of the 50's. With a sleek high back design, it's perfect for modern board rooms and conferencing spaces but also a great choice for executive visitor areas.

Tilt is a highly customisable product family of eight chairs. All members of the Tilt family supplement each other and may be used in the same premises but in different spaces. The standard coating and upholstery options are vast, but completely customised solutions are also possible on request. This enables the Tilt family to fit in most diverse settings – board rooms, conferencing spaces and visitor areas.

Height: 1040mm

Seat height: 480mm

Width: 460mm

Depth: 585mm

PRINCIPAL DESIGNER

Juha Rista

Juha Rista is an interior architect in one of the leading interior architectural offices in Finland. This gives him a unique opportunity to study and create experiences in the project field. As a designer, Juha likes to create, solve, and innovate new and experimental things in his daily life. He has been interested in furniture and lighting design since 1998 and created numerous bespoke furniture and lighting objects for hospitality and office projects.
