

Takit Wood

Jouni Leino

inno

Building on the design of our Takit metal coat rack by Leino, this new modular version combines simplicity with practicality. Made from certified solid wood, it offers a warmer, more natural feel. Designed to function as both a coat rack and a space divider, it's part of a product family that includes a matching bench and a double or single shoe rack. Its clean lines and minimalist style make it a versatile choice for modern public spaces.
