TOOLS for
ARCHITECTS

Tools for Architects

Inno began manufacturing distinctive and timeless products in 1975, setting itself apart from the mainstream. Today, Inno is renowned for its internationally acclaimed collection. We develop innovative, high-quality products designed to meet the most demanding requirements of public interiors.

“We strongly believe that a good product must offer not just aesthetics and functionality—it has to feel right.”

Tools for Architects is a preview designed to give you a taste of our collection.

Sustainable Practices

At Inno, sustainability has always been a priority, and it plays an increasingly central role in our operations. We are committed to producing long-lasting products, using certified or recyclable materials, and minimizing emissions. Our environmental management processes are certified under ISO 14001:2015. Additionally, we actively participate in afforestation projects to offset our raw material use and contribute to mitigating the effects of climate change.

We are constantly working to improve our policies within our environmental program, ensuring that our actions align with global sustainability goals and meet the highest standards in every step of our production process.

Whippy

Design: Rasmus Palmgren

The Whippy Chair exemplifies meticulous craftsmanship and sustainable design. Made from certified wood, it blends Nordic elegance with a foldable mechanism for easy storage and transport.

Ideal for venues needing flexible seating, it offers optional accessories like a trolley for storage and row connectors for organized setups. A soft seat version is available for added comfort. When folded, the chair is flat-packed, saving space and reducing its carbon footprint.

Naku Family

Design: Harri Korhonen

The Naku product family includes a stackable chair, stools, tables, coffee tables, and a bookshelf unit. Combining fine wood craftsmanship with a timeless design, these pieces offer durability and longevity giving these Tools for Architects a unique long-life cycle.

The name Naku comes from Finnish children's slang, meaning "nude" or "bare." This reflects designer Harri Korhonen's straightforward approach, where the Naku series reveals the essence of each piece by focusing on the purity of form and function.

Each product is made from certified solid wood.

Naku Stack

Design: Harri Korhonen

Fine craftsmanship and timeless design define the nature of Naku Stack chair. This wooden, stackable chair with armrests is manufactured of certified birch, ash or oak. You may choose it without upholstery, seat all over upholstered with fabric or seat surface upholstered with leather.

Naku Stack chair is a perfect choice for cozy get-together spaces, meeting and dining rooms as well as restaurants.

Naku Shelves

Design: Harri Korhonen

Crafted from high-quality certified wood, the Naku Shelf features a self-supporting structure that allows for easy assembly and disassembly without the need for tools. This thoughtful design prioritizes simplicity, making it convenient to relocate and versatile as both a bookshelf and room divider. Additionally, its flat-pack design throughout various stages of its life cycle optimizes transport space, reducing its carbon footprint and supporting Inno's commitment to sustainability.

Naku Shelf High

Naku Shelf Low

Naku Stool & Bar Stool

Design: Harri Korhonen

Naku stools are made of solid wood, featuring an undressed, honest form that highlights fine craftsmanship. The stool is stackable and can also be used as a small coffee table, supporting the multi functionality of spaces. An uphol-

stered version of the seat is available, making it perfect as an extra seat at home, in the office. The bar stool version offers different seat heights to suit various needs.

Naku Coffee Tables

Design: Harri Korhonen

Naku tables are crafted from solid wood, featuring a minimalist, unadorned design that emphasizes the beauty of natural materials and fine craftsmanship. Their straightforward form exudes an honest aesthetic, making them a versatile addition to any space. In addition to their timeless design, Naku

tables are stackable, allowing for easy storage and adaptability in multifunctional environments. This combination of practicality and craftsmanship makes them ideal for both private and public settings.

Naku Tables

Design: Harri Korhonen

Naku tables are made from solid wood, showcasing a simple, unembellished design that highlights the elegance of natural materials and expert craftsmanship. Their clean lines and straightforward style create a genuine

aesthetic, making them a flexible choice for various spaces. This blend of functionality and quality craftsmanship makes them perfect for both private and public use.

Taivu Meeting

Design: Mikko Laakkonen

The Taivu Meeting is a swivel chair with graceful contours and excellent comfort. A small three-dimensional tilt movement is a standard feature that naturally follows your body movements, providing a dynamic and ergonomic sitting experience. Both the seat and armrests are fully upholstered in fabric or leather.

Taivu Meeting YDL

Taivu Meeting ZDL

The Taivu Meeting chair can be easily tailored to fit a wide range of interiors, such as boardrooms, executive conference spaces, and home offices.

Taivu Compact Lounge

Design: Mikko Laakkonen

The Taivu Compact Lounge Chair is compact in size yet distinctive in expression. With its graceful contours, exposed frame, and clear structure, it offers a lightweight and original aesthetic. Additionally, its sitting comfort is ideal for public spaces. The Taivu Compact Lounge can be easily tailored to suit a variety of interiors, including hotel rooms, lobbies, lounges, and waiting areas.

Taivu

Design: Mikko Laakkonen

Taivu is a generously proportioned, highly comfortable lounge chair designed by Mikko Laakkonen. Its graceful contours, exposed frame, and clear structure give it a lightweight, understated aesthetic. Taivu can be easily tailored to suit a variety of public and private interiors by combining complementary or contrasting upholstery and frame colors.

Lab Wood

Design: Harri Korhonen

The Lab WW armchair combines coziness with functionality. Its soft, quilted seat provides excellent seating comfort, while the sturdy wood frame allows for vertical stacking, making it easy to maximize space. Lab WW offers casual comfort, making it ideal for meeting rooms, restaurants, or lobbies.

Lab WW

Lab W

Lab

Design: Harri Korhonen

Lab is a meeting chair that combines the casual coziness of a soft, quilted seat with the refined elegance of its armrest silhouette and a functional star base. The base is available with either wheels or gliders and includes a gas lift and swivel mechanism. Lab delivers a high level of comfort to any meeting room or multifunctional workspace.

The Lab family includes a wide range of chairs, tables, and sofas, all designed to bring comfort and coziness to everyday working environments.

Tilt L

Ono

Design: Susanne Grønlund

Ono is a lightweight wooden chair with a welcoming design rooted in Scandinavian tradition, blending history with modern functionality and aesthetics. Its construction features a backrest that lifts the seat from the frame, giving it a

light, inviting look. The backrest's opening ensures ergonomic support and makes the chair easy to handle and clean.

Intro

Design: Ari Kanerva

Intro is a versatile and lightweight wooden chair designed by Ari Kanerva. This enduring design draws its inspiration from the unpretentious heritage of Nordic design. The chair's meticulous detailing is characterized by its straightforwardness and graceful execution. Crafted from certified wood, this chair

possesses versatility and a lightweight quality, making it equally suitable for different public spaces, from educational institutions and conference rooms to waiting areas and collaborative workspaces. Its compact and stackable nature is complemented by excellent ergonomics.
